Subject: HB 6656

I object to bill 6656. The burdens that this Bill impose to gun owners of both cost and presumption of high risk status are unfair and unconstitutional. Firearms owned by lawful and responsible citizens pose no unusual risks to others, or society at large. This Bill is illegal in several areas, and unconstitutional at its very conception. Americans should not and do not have to register and insure the very extensions of their Constitutional Rights. Firearms are not privileges that we purchase and own with permission of the State, they are the instrumentalities of the Second Amendment. This Bill is harassing by nature, burdensome by cost, and should be stricken down immediately.
